HPE GreenLake

Harness the power of your data

HPE GreenLake edge-to-cloud platform

Your data isn't confined to the datacenter anymore. It's being generated, in staggering volumes, at the edge. And the edge itself is expanding and evolving.

It's no longer just a branch office or a remote facility. It's retail sales points, oil rigs, airports, vehicles, and more.

?

How do you bring agility and simplicity across edge to cloud?

Data sets are vast and massively diverse as well as entangled across many applications.

You can't send everything to the cloud, **but you can bring the cloud experience to everything.**

HPE GreenLake

The cloud that comes to you

Self-service
Select and deploy the cloud services you want with point-and-click simplicity

Pay as you go
Get new projects running without heavy up-front costs and delays

Edge — **Colocation/Data centers** — **Cloud**

The HPE GreenLake edge-to-cloud platform gives you the cloud experience in your own environment

Managed for you
