# NetApp

Top 10 ways NetApp is getting real with AI

1 Amazing data moves

The right data when and where you need it—in perfect rhythm.

2 Unparalleled simplicity

Build an integrated data pipeline that spans edge, core, and cloud. That's the power of NetApp® ONTAP® software.

3 Cloud complete

Accelerate data-driven decisions with the industry's most comprehensive cloud data services. NetApp Cloud Volumes ONTAP. NetApp DataOps Toolkit. And more.

4 Data platform unity

Distributed, disparate data? Harness it with support for myriad data formats and workloads, including natural language processing and computer vision.

5 Future ready

Protect your investment while controlling costs. Rightsize now and scale almost endlessly. Share data seamlessly across on-premises and cloud environments, and nondisruptively integrate new technologies.

6 Powerful defenses

Safeguard your data no matter where it is with integrated data protection and compliance.

7 Blazing speed

NetApp cloud-connected all-flash storage systems are fast. Get more than 2GBps of sustained throughput (5GBps peak) with well under 1 millisecond of latency, while the GPUs operate at over 95% utilization.

8 Cool confidence

Partner with the 25+ year leader in NFS.
- Proven 10+ year track record in converged infrastructure (FlexPod® solutions)
- Numerous AI industry awards
- Broad AI partner ecosystem
- 24/7 worldwide services and support

9 Stunning insights

Help data scientists focus on science instead of IT by relying on an easy-to-deploy, best-in-class open-source stack.

10 Effortless tiering

Reduce costs by automatically moving inactive data to low-cost storage tiers, such as Amazon S3 or NetApp StorageGRID® solutions, using FabricPool technology.
