

# HOW to SYNC, SHARE & CONTROL DATA SECURELY

UNSANCTIONED FILE SHARING creates serious security and regulatory compliance issues.

**70%** of IT professionals know of or suspect rogue online file sharing by employees<sup>1</sup>

**68%** of employees store work-related information in personal sync-and-share solutions<sup>2</sup>

**84%** of Dropbox users still have access to a previous employer's systems<sup>2</sup>

**64%** of IT organizations are not backing up and ensuring recoverability of non-PC endpoints<sup>3</sup>

**PROTECT SENSITIVE CORPORATE DATA**

**MOVE EMPLOYEES** from risky consumer sharing services to secure, compliant Commvault® File Sharing.

**CONTROL YOUR CORPORATE DATA.** >> Wherever it goes. On any endpoint.

## Commvault File Sharing is:

**SIMPLE**

- Enable single-platform integrated endpoint data management

**POWERFUL**

- Store, access and share files on different devices from virtually anywhere

**FLEXIBLE**

- Deploy as an on-premises, hybrid or cloud solution

**SECURE**

- Apply customized, IT-defined security
- Store data on the Commvault Edge Drive

**SCALABLE**

- Synchronize files between multiple endpoints

**COMPLIANT**

- Support all eDiscovery and compliance requirements
