

# Turbocharge your business for AI and hybrid cloud

All-in-one solution for next-generation applications.  
(available September 2021)

## Persistent data

Speed up your containerized applications with a parallel data mesh and data services. Designed with high-performance access to global data.

## Containerized applications

## Spectrum Fusion HCI

IBM Spectrum® Fusion software-defined storage (SDS)

A fast and simple path to AI and hybrid cloud. Combined with enterprise security, resiliency and global data access. Designed to optimize data for containerized applications.

Red Hat® OpenShift® Container Platform

Compute, storage and networking

Integrated and optimized resources available for faster AI. Designed to address the challenges of mission-critical workloads.
